

California Instruments Asterion AC Series

High Performance Programmable AC / DC Power Source

500 VA - 36000 VA
200 / 400 Vac
250 / 500 Vdc

Advanced Features

- High power density in 1U / 2U / 4U / 14U chassis up to 18kVA
- Intuitive touch panel control
- Innovative iX2™ current doubling technology
- Multi-language display for global operation
- Auto paralleling for higher power
- Single phase 1U models and 1 or 3 phase selectable 2U / 4U / 14U models
- Complete avionic test suites (optional)
- ATE version available in 1U, 2U and 4U models
- Standard LXI LAN, USB and RS232, optional GPIB
- Legacy CSW5550 Emulation on the AST6003A1 Model

Performance. Reliance. Brilliance.

Inspired by the enduring power of a brilliant star, the California Instruments Asterion line of AC power sources by AMETEK Programmable Power combines intelligence and flexibility to create an advanced platform of AC solutions. This easy-to-configure design features sophisticated technology for delivering high performance, programmable AC and DC power. Its sleek design packs maximum power density into a low-profile form factor with an intuitive touch screen interface placing that power at your fingertips. Centralized control and unparalleled modularity make Asterion the most adaptable platform on the market. Its groundbreaking capabilities set the standard for affordable, precision power sources.

Maximize rack space utilization with leading AC power density in 1U/2U/4U chassis.

Employ full output power over widest voltage range with iX2™ technology.

Quickly and expertly control the AC source with intuitive touchscreen.

Control via Front Panel Touchscreen & Encoder or available digital control interfaces.

The Asterion AC Series is Digital Signal Processor (DSP) controlled and can be operated from the intuitive, easy to use front panel touchscreen or the Ethernet LXI, USB and RS232 standard control interfaces, as well as through the optional GPIB control interface.

The touchscreen function group icons include a Dashboard, Output Programming Parameters, Measurements, Sequencing, Configuration, Control Interfaces, Applications, and System Settings. Function selection and parameter entry can be achieved either by direct selection from the touchscreen or by using the encoder selector button. The control resolution is adjusted by a dynamic rate change algorithm that combines the benefits of precise control over small parameter changes with quick sweeps through the entire range.

Applications

The Asterion AC Series is designed for testing today's complex electronics, including avionics, telecommunications and commercial electronics requiring low profile, light weight power sources with high power density. Other applications include:

- Testing for real world power conditions using different waveforms on all three phases (including DC)
- Load susceptibility testing with sequence or event programming and multiple voltage harmonics
- Power line disturbance testing
- Commercial and military avionics testing, including MIL-STD 704, RTCA/DO-160, B787, and ABD100
- Power supply testing for AC-DC, DC-DC converters and Uninterruptable Power Supplies
- IEC testing with source compliance to IEC 61000-4-7 and 4-15, and immunity testing per IEC 61000-4-11, 4-13, 4-14, 4-17, 4-28, and 4-29
- AC power simulation and manufacturing and process control
- Frequency & voltage conversion
- ATE applications

AC, DC, or AC+DC Output

A direct coupled, transformerless design allows AC and DC on separate phases or on the same phase. Hi DC content waveforms (up to 400V) can be created with no derating of output power, even with 100% reactive loads, eliminating the need for a separate DC supply. Waveform programming is easily accomplished using the Virtual Panels interface software. Waveforms can be uploaded and modified from a digital scope. The waveforms can then be downloaded into the Asterion AC sources and output to precisely simulate real world conditions.

Asterion Series Transient Generation

The Asterion Series controller has a powerful AC and DC transient generation system that allows complex sequences of voltage, frequency, and waveshapes to be generated. When combined with a multiphase arbitrary waveform capability, the AC and DC output possibilities are truly exceptional. Transient generation is controlled independently yet time synchronized during three phase operation. Accurate phase angle control and synchronized transient list execution provide unparalleled accuracy in positioning AC output events.

Transient programming is easily accomplished from the touch screen display, where intuitive menus guide the user through the transient definition process. These menus provide a convenient listing of the programmed transient sequence and allow for transient execution, Start, Stop, Abort, and Resume operations. User defined transient sequences can be saved to non-volatile memory for instant recall and execution later. The included Virtual Panels software interface program supports transient list generation and editing using a spreadsheet-like data entry grid. A library of frequently used transient programs can be stored to disk using this software suite.

Harmonic Analysis

The Asterion Series provides detailed amplitude and phase information on up to 50 harmonics of the fundamental voltage and current (up to 16kHz). Harmonic content can be displayed in both tabular and graphical formats on the color touch display for immediate feedback to the operator. Alternatively, the included Virtual Panels software can be used to display, print, and save harmonic measurement data. Total harmonic distortion of both voltage and current is calculated from the harmonic data.

High Crest Factor

With a crest factor of up to 7:1, the Asterion Series AC source can drive difficult nonlinear loads with ease. Since many modern products include switching power supplies, they tend to pull high repetitive peak currents. An AST4503A1D can deliver up to 52.5Apk (200V range) per phase.

iX2™ Constant-Power Mode Output Characteristic

The iX2™ Constant-Power mode has an output characteristic where full rated output power is available from 50% of full-scale output voltage to 100% of full-scale output voltage, as depicted in the graphs of Figure 1-1 and Figure 1-2. The output current versus output voltage follows a constant-power relation where the output current would be 200% of the full-scale value when the output voltage is 50% of full scale. The current ratings are also a function of output frequency, as shown in Figure 1-1 for the AST751, AST1501, AST2253, AST4503, AST6003, AST12K3, AST18K3 and AST3001 models above 500 Hz, and in Figure 1-2 for the AST501, AST1503, and AST3003 models above 1.2 kHz.

Protection

Parameter	Specification
Output Overvoltage Protection (OVP)	Programmable to 115% of full-scale output voltage; exceeding OVP threshold results in shutdown of output.
Output Current Limit Protection	User-selectable constant-current mode or current-limit mode, with programmable current setpoint; in Constant-Current mode, output current is regulated to setpoint; in Constant Voltage mode, exceeding current-limit setpoint results in shutdown of output; Current limit delay: programmable from 100 ms to 10s.
Output Short-Circuit Protection	Instantaneous and RMS current limit
AC Input Overcurrent Protection	Internal fuses in each phase for fault isolation; not user replaceable
AC Input Undervoltage Protection	Automatic shutdown for insufficient AC input voltage
AC Input Transient Protection	Protection to withstand EN61326-1, Class-A surge levels
Overtemperature Protection (OTP)	Internal temperature monitors cause shutdown of output if temperature thresholds are exceeded

Warranty Statement:

AMETEK Programmable Power Inc. warrants its products to be free from defects in material and workmanship. The warranty period is from the date of original shipment of the product to the original purchaser (see website for warranty periods by product). As of 10/1/19, all Asterion AC units come with an industry-leading five (5) year warranty. Extended warranties available and an enhanced Warranty+ option on new purchases is also available. Consult with your local sales representative to learn more.
