R.T.P
Date de création : 18/04/2025
Date de modification : 22/04/2025
Version : 1

Since June 2023, we have acquired Aetrium products, further strengthening our expertise and commitment to providing high-quality services. Our team is composed of two laboratory technicians, one software engineer, and one industrial engineering student. We have developed a wide range of services to meet your needs, including calibration, module repair and maintenance, diagnostics and functional testing, spare parts and DUT board sales, and PC upgrades.

Module Calibration & Repair

Extend the lifespan of your equipment with our expertise.

Calibrating your modules is essential to ensure the accuracy and efficiency of your operations. With our calibration and repair services, we ensure optimal performance and maximum durability for your equipment.

- Calibration : Performance verification and adjustment to guarantee optimal precision.
- Repair : Diagnosis and repairs to ensure proper functioning and extend the lifespan of your products without the need for replacement.

Entrust us with your modules and ensure consistent performance.

Diagnostics & Functional Testing

Identify and anticipate failures before they become critical.

Malfunctions can slow down your production and impact your results. Our expertise allows us to accurately diagnose the condition of your equipment and perform in-depth functional tests to ensure optimal operation.

- Comprehensive analysis of your modules and components.
- Cutting-edge equipment and advanced testing techniques.

Trust our specialists to ensure the reliability of your equipment.

Spare Parts & DUT Boards Sales

High-quality components to ensure the continuity of your operations.

Reliable and suitable components are essential for high-performing equipment. We offer a wide range of spare parts and DUT boards to meet all your needs, ensuring the maintenance and evolution of your systems.

Our advantages :

- Tested and certified spare parts & DUT boards.
- Fast availability and optimized stock.
- Technical support to help you choose the right component.

Order now and secure your equipment with top-quality components.

PC Upgrades

Modernize your equipment and boost efficiency.

Are your systems still operational but starting to slow down? Instead of replacing your entire setup, choose a PC upgrade! We offer tailored solutions to improve performance and ensure compatibility with the latest market requirements.

Our upgrade solutions :

- Sales of PC TCU or User PC upgrades.
- Software and operating system updates.

Give your equipment a second life.
